

Hivista P9

Global the Shortest Focus & Highest Lumens LED AIO Projector

Global No.1 Ultra-short Focus and the Highest Lumens LED Projector. Interactive projector is mainly used in Education and Business field currently. LED light source been applying to P9, avoiding of bulb consumable items problems, which solved the biggest maintenance problem of traditional projector. Ultra short focus, which avoid the Shadows shade problem of short and long focus projector. P9 pushes all-in-one interactive projector applying to Education and Business into a much more higher level because of its built- in computer (Android Optional)/interactive function and strong 2.1 sound speaker. P9 is the first and newest LED projector being promoted on 2015, and will be a long-term promoting product line as well, Hivista will keep developing and promoting higher configuration and updated P9 serious products in the coming year.

(Interfaces)

(Details)

0.3 Ultra Short-focus

38cm@80inches screen, no shadows.

300" Huge Projection Screen, Not Only Big.

The First 300" HD projection, takes users more visual joy. Teaching class in huge multi-media room easily.

800 Lumens Highest LED Projector

P9 is 800 color-lumens, which is different to normal projector's "Lumen". Color-lumens demarcated by three colors, but the normal-lumens is demarcated by pure white color only. So P9's 800 lumens equals to 2500lumens of normal projector. Even play in daily light, projection effect is still outstanding.

16.7 Million Bright Color

With precise DMD digital light processing chip built-in, harmless to eyes, added with professional arithmetic of color deploy, to provide vivid color reproduction experience.

New Light Source, No Need Maintenance

Using high quality of Osram LED lamp for P9, which is brighter, has lower power consumption and less heat. What's more, the lamp has a very long lamp life of 50000 hours, which can bring you at least 20 years enjoying.

Interactive Function, the World' s No. 1

Compatible with both Windows and Android system, support 64 people writing on Windows system and 2 people writing on Android system at the same time.

Android Interactive Module, Make Your Projector to be Interactive

It's the most smallest interactive module in the world for 15mm*20mm. It comply with Android system, windows either. It can fit LED projector properly. The projector manufacturer can use it to change normal projector into interactive projector.
